

WAHEED ASLAM

MERN Stack Developer

Faisalabad, Pakistan | +92 343 0871243 | waheeddd62@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience designing and shipping full-stack, AI-powered SaaS platforms — spanning realtime market-intelligence tools, SEO automation systems, and healthcare applications. Proficient in React, Next.js, Node.js, Express.js, and MongoDB, with practical experience integrating AI agents (Groq AI, fine-tuned Llama 2), OAuth2 authentication (Google, JWT), Stripe subscription billing, and real-time features via Socket.io. Experienced in building automated data pipelines (Puppeteer, Cheerio, cron scheduling) and comfortable owning a product end-to-end — from database architecture to production deployment.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Vite, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Google OAuth2

Database: MongoDB, Mongoose

AI & Automation: Groq AI, Llama 2 (fine-tuning), Puppeteer, Cheerio, node-cron

Real-Time & Payments: Socket.io, Stripe (Checkout & Webhooks)

Tools & Testing: Git, GitHub, Postman, VS Code, Jest, Vitest, GitHub Actions (CI)

PROFESSIONAL EXPERIENCE

Netlink Solutions — MERN Stack Developer

Faisalabad, Pakistan | February 2023 – April 2025 (2 Years)

- Developed and maintained full-stack MERN features, implementing RESTful APIs, JWT-based authentication, and Google OAuth2 login flows for secure, production-grade user management.
- Integrated AI capabilities into client applications using the Groq API and fine-tuned Llama 2 models to power automated content generation, analysis, and conversational features.
- Built automated data pipelines with Puppeteer, Cheerio, and node-cron for scheduled scraping, data collection, and background job processing.
- Implemented Stripe subscription billing (Checkout sessions, signature-verified webhooks) to manage plan lifecycles and automate SaaS payment workflows.
- Built real-time features with Socket.io, including live dashboards and messaging systems, and designed MongoDB/Mongoose schemas to support them.
- Collaborated in an agile team to debug, test, and ship production-ready code on schedule; recognized by company leadership for technical proficiency and professionalism.

PROJECTS

Hunting Goals — AI-Powered Winning Product Finder

Full-Stack SaaS Platform | Status: Deployed

- Built a full-stack SaaS platform that scrapes real-time market signals (Facebook/Instagram Ads, Daraz, OLX, Google Trends, TikTok) to help Pakistani e-commerce sellers identify winning products ahead of competitors.
- Designed a weighted AI “Win Score” engine and integrated Groq AI to generate product analysis, ready-to-use ad copy, and supplier/sourcing recommendations.
- Automated ad and market data collection with Puppeteer (stealth scraping) and delivered live in-app updates via Socket.io.
- Implemented JWT authentication, Google OAuth, and Stripe subscription billing (Free/Pro/Business tiers) with webhook-driven plan management.
- Built a responsive front end with React, Next.js, and Tailwind CSS, and deployed the full system on Render with automated cron jobs and email/WhatsApp alerts.

Tech Stack: React, Next.js, Node.js, Express.js, MongoDB, Puppeteer, Groq AI, Socket.io, Stripe, JWT, Google OAuth, Tailwind CSS

SEO Operator System — AI-Powered SEO Operating System

Full-Stack SaaS Platform | Status: Deployed

- Built a full-stack SEO automation platform powered by 5 AI agents (technical audit, keyword research, content review, competitor gap analysis, action-plan synthesis) using the Groq API.
- Integrated the official Google Search Console API via OAuth2 for rank tracking, encrypting refresh tokens at rest with AES-256-CBC.
- Implemented Stripe subscription billing (Checkout, signature-verified webhooks, plan lifecycle) with server-enforced free-tier limits.
- Designed an async job pipeline (queued → running → done/failed) with a cron-based watchdog for reliable long-running audits and reports.
- Developed a React, TypeScript, and Vite front end with Tailwind CSS, Zustand state management, and Recharts data visualization; covered by 51 automated tests (Jest, Vitest) with CI via GitHub Actions.

Tech Stack: React, TypeScript, Vite, Node.js, Express.js, MongoDB, Mongoose, Groq AI, Google OAuth2, Stripe, Tailwind CSS, Zustand

MindMate — Mental Health Support Platform

Full-Stack MERN Application | Status: Deployed

- Developed a hybrid mental health platform combining an AI chatbot with real human doctor connectivity for immediate and ongoing support.
- Fine-tuned a Llama 2 model across 30+ categories with 240+ curated responses to power instant AI-driven mental health support.
- Enabled appointment booking, doctor messaging, and digital prescriptions within a secure MERN application.
- Implemented JWT authentication, Google OAuth, and real-time messaging with Socket.io for secure, live patient-doctor communication.

Tech Stack: MongoDB, Express.js, React, Node.js, TypeScript, Socket.io, Tailwind CSS, JWT, Google OAuth

GitHub: github.com/waheed477/mindmate

Live Demo: mindmatecare.netlify.app

CORE STRENGTHS

- End-to-end product ownership — architecture, database design, and deployment across 3 production-ready SaaS platforms.
- Hands-on AI integration — Groq AI agents and Llama 2 fine-tuning applied to real, deployed applications.
- Third-party systems integration — OAuth2, Stripe billing, Google Search Console API, and email/WhatsApp notifications.
- Real-time architecture — Socket.io-based live dashboards and messaging implemented across every project.

EDUCATION

Bachelor of Science in Computer Science

University of Agriculture, Faisalabad | 2022 – 2026
